THE CURE FOR TUNNEL VISION

DomeVex[®]

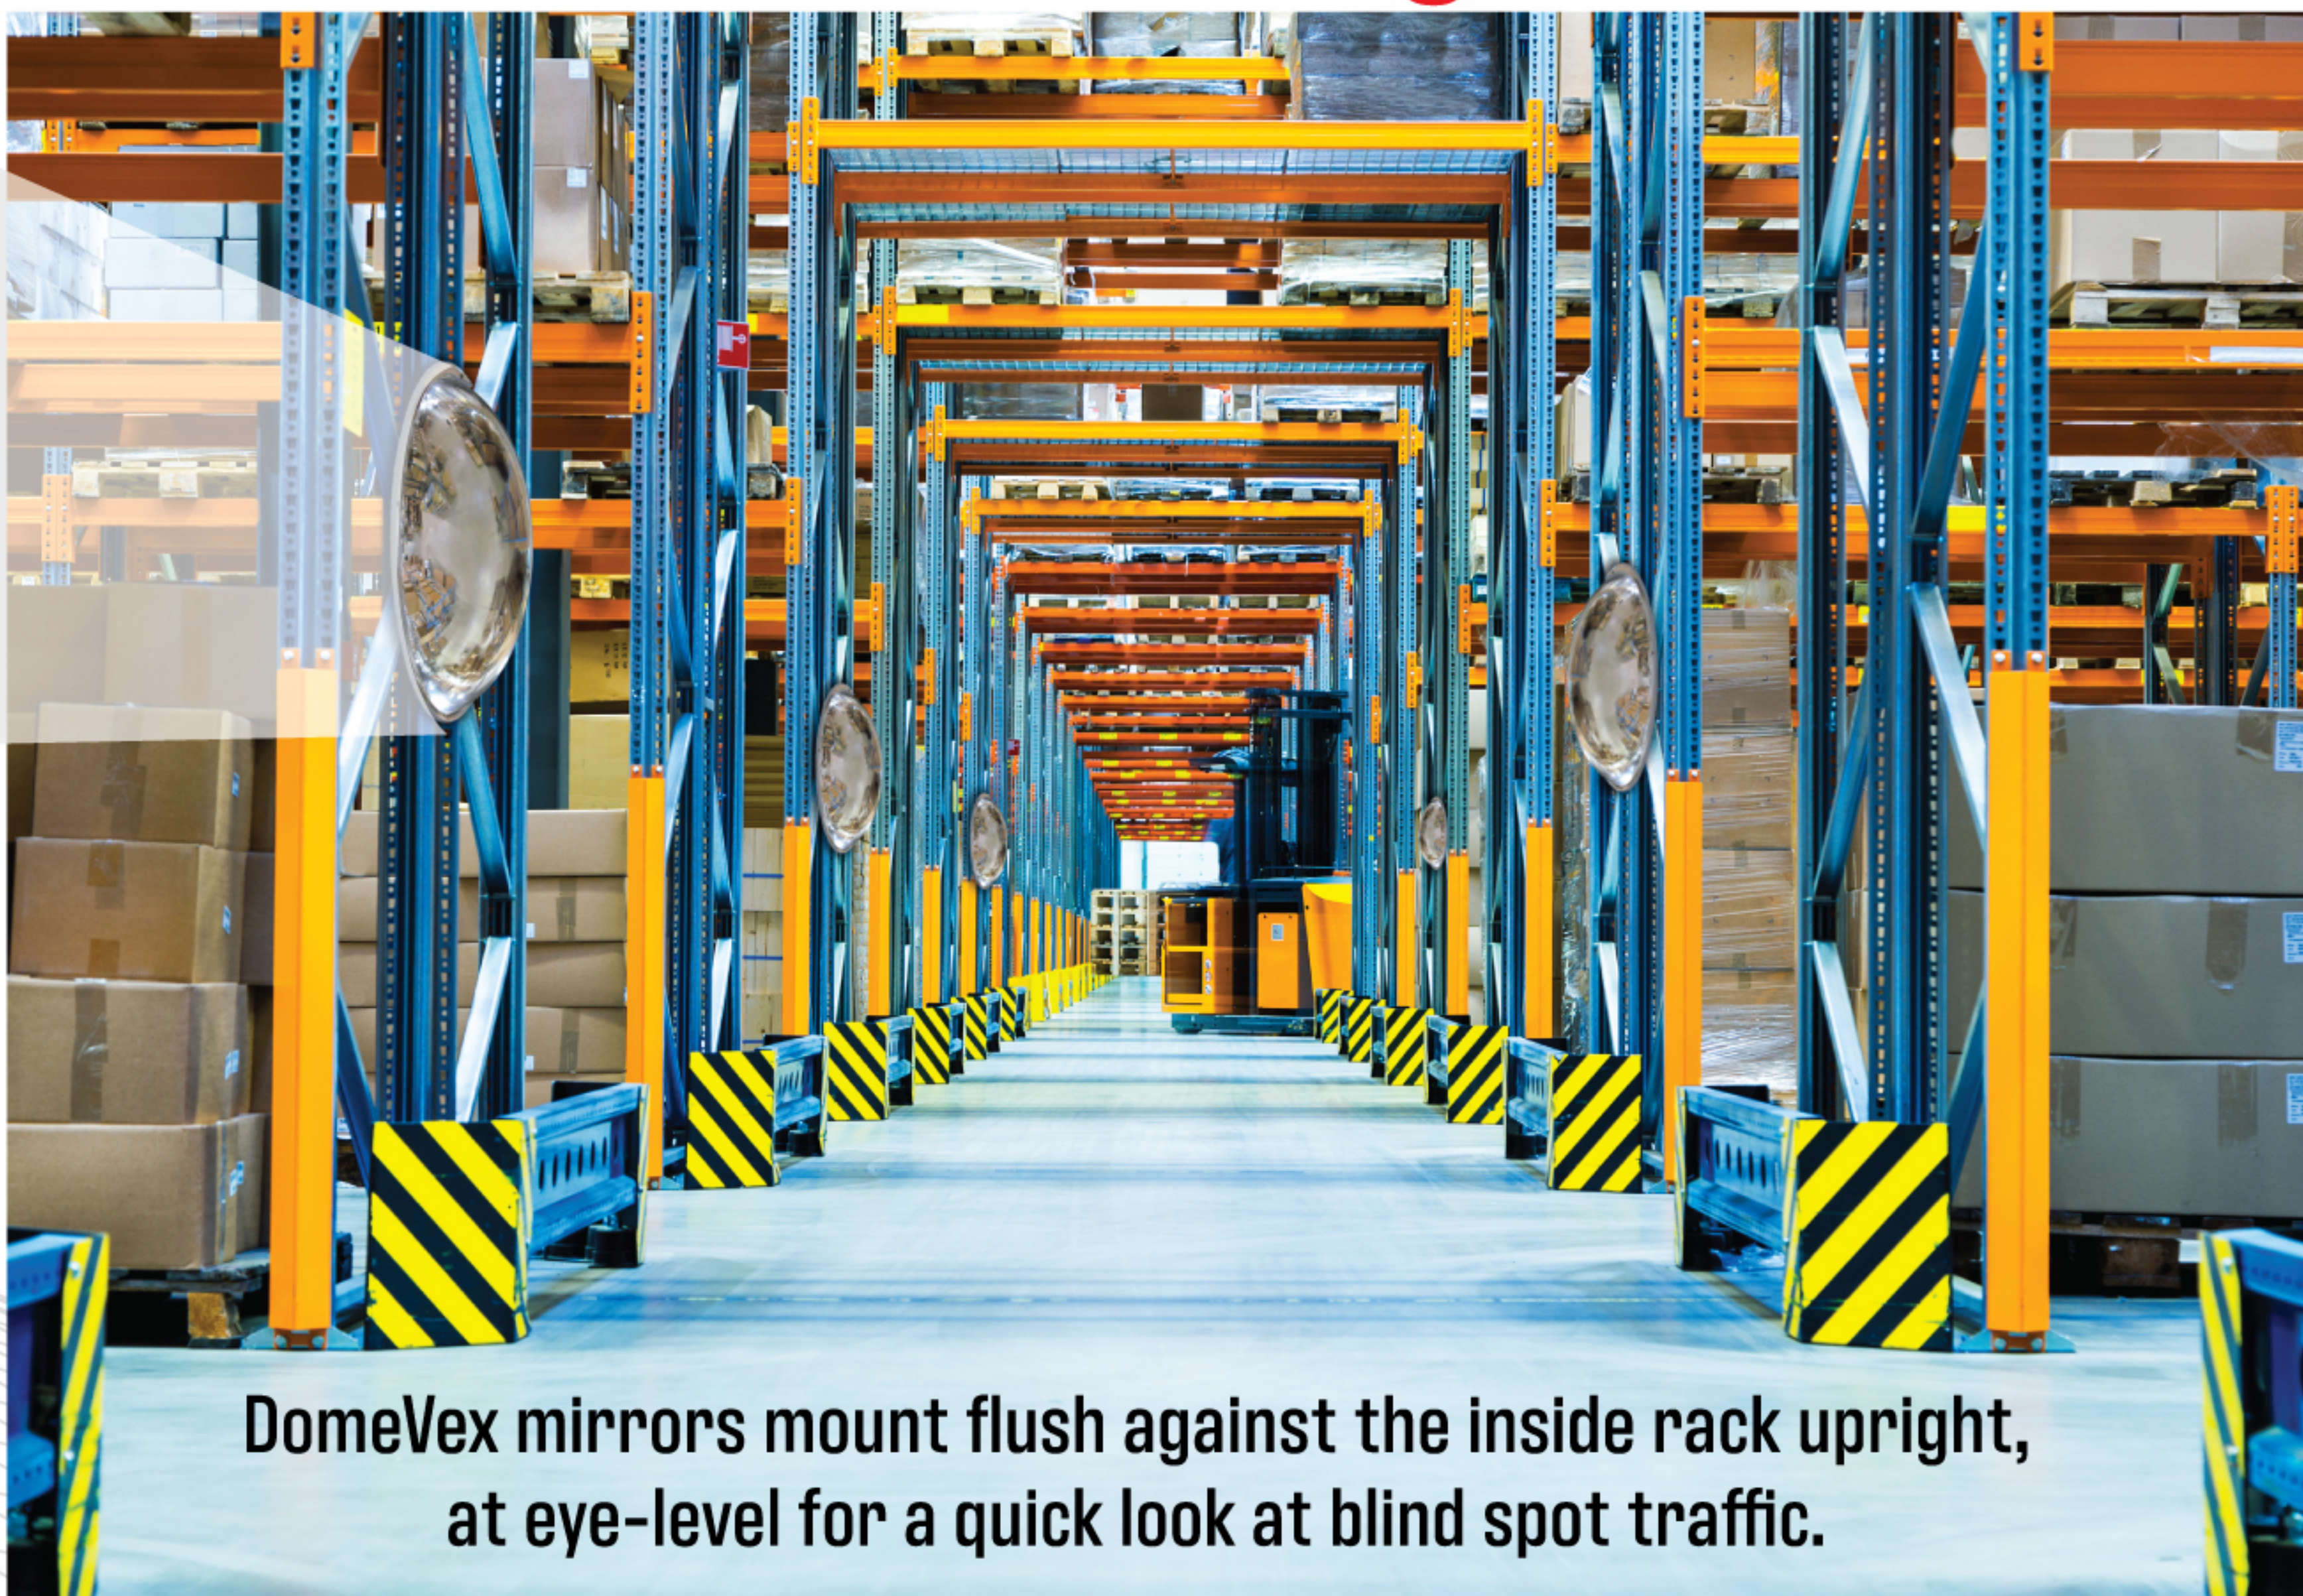

The 180° Viewing angle can warn drivers of traffic entering the tunnel aisle from multiple rack aisles.

3X's the Viewing Area of a

Cross aisle traffic can create a big problem in tunnel type aisles in your storage rack areas.

These areas have been unprotected in the past but now our **DomeVex** Mirrors can provide a solution.

DomeVex mirrors mount flush against the inside rack upright, at eye-level for a quick look at blind spot traffic.

Conventional Convex Mirror!

Sizes: 16" - 24" - 32" - 42"

The view distance ratio is about 1 foot of viewing to each inch of the diameter of the mirror.
