

NEW

The Mirrored Room Experience  
**WHO WE ARE**

*Se-Kure Domes & Mirrors* is a primary supplier of domes and mirrored products for security, industrial/warehouse safety, pedestrian safety and retail loss prevention. Now *Se-Kure* manufactures products for the promotional products industry. This includes officially licensed brands and custom designed mirrors and displays for wholesale distributors, brick & mortar dealers and e-commerce sellers. *Se-Kure Creations* is the new brand name for these product offerings.

Our 62,000 square ft. manufacturing facility in Sturgis, Michigan (USA) specializes in all things related to plastics.

We offer custom design and illustration, product development/engineering, manufacturing and finally product fulfillment/distribution.

What starts out as a blank sheet of acrylic, evolves into vacuum formed domes, custom printed images, laser engraved shape cutting and finally the most important process we offer; the ability to mirror the acrylic parts. This aligns with our printing on the second surface (the backside) of the acrylic sheet and for post print mirroring on the backside. Our mirror quality exceeds that of glass mirrors which enhances our printed inks. We are the only company offering the second surface printing/mirroring process in the USA.

With our product line being manufactured in the United States, we control inventory and quality. This translates to high volume output, low labor and quick turnaround and delivery. We are never prone to supply chain shortages or for long lead times waiting for off-shore products to arrive.

Our parent company (*Se-Kure Controls, Inc.*) located in two manufacturing plants in the Chicago area has been the industry leader in designing and manufacturing loss prevention devices since 1965. This commitment to product innovation has protected Global retailers for nearly 60 years and has literally prevented countless millions in product theft losses.

*Se-Kure Domes & Mirrors* and *Se-Kure Controls, Inc.* have a deep commitment to manufacturing quality, design/innovation and customer satisfaction.
